**Brief Introduction** 

Beta 2.5

The 3D perception model CompactView WQ65 is a DLP projector with WQXGA 2560 x 1600 resolution and a contrast of 8000:1. The projector can illuminate images up to 702 cm wide thanks to its 6500 Ansi lumens. The projector can create rooms with residual light with a smaller image width, we recommend a maximum of 468 cm. If the image width is not sufficient, the projector offers integrated edge blending software, which allows several projectors to project a large image together. Playing 1080P is also no problem for the projector. The model was built by 3D perception in 2009 and is no longer current, but is still very popular in our projector database. DLP Chip
