

M3 Mini DLP Projector

Present with confidence

1902719

Overview

A professional digital projecting solution for bright, powerful business presentations

Description

Introducing the new Nobo M3 Plus mini projector.

Small enough to fit in your pocket. Big enough for powerful presentations. Now you can present wherever you are!

The supplied 4GB micro SD card, combined with a 2000:1 contrast ratio and up to 50 Lumen brightness, allows you to store images, promotional video's and even complex PowerPoint presentations, so you can present without the need for your laptop!

These days, audiences expect engaging, dynamic presentations in order to bring ideas to life. What better way to do that, than projecting your ideas using the Nobo M3 mini projector and desktop screen?

In addition to incorporating the latest digital technology ensuring precise digital picture quality, it

is remarkably simple to use, compact, light, easily portable and highly reliable.
