

Anker Nebula Cosmos 4K SE

ANKER NEBULA COSMOS 4K SE

Top

A brief introduction to the Nebula Cosmos 4K SE: The Anker standard portable laser DLP projector offers 1800 Ansi lumens and a UHD (4K2K) 3840 x 2160 resolution. The manufacturer specifies a laser service life of 30,000 hours, which is over 20.5 years with a daily viewing time of 4 hours. As the projector has horizontal and vertical keystone correction, the projector can be set up with plenty of free space in the room. 1800 Ansi lumens ensure that a picture width of 431 cm is also possible. However, if there is room light, the picture should be a maximum of 287 cm wide. Google TV turns the projector into a versatile media hub that can be seamlessly integrated into a smart home. The projector has Airplay, Miracast Screen Mirroring support, which enables direct playback of videos in high resolution and surround sound from smartphones, tablets and PCs with Android, Windows or iOS via Wi-Fi. The projector can also play 1080P and 4K without any problems. The projector is very quiet compared to others with 28 decibels of operating noise.
