

ANMESC HY300

ANMESC HY300

Brief introduction of the ANMESC HY300. The portable game LCD LED projector has a HDTV 1280 x 720 resolution and a contrast of 1500:1. The manufacturer states an LED lifespan of 30,000 hours, which would be over 20.5 years with 4 hours of viewing per day. The projector also offers an integrated media player that can be used to play files directly. A built-in horizontal and vertical keystone correction function allows freedom when setting up the projector. An image width of up to 111 cm is possible. However, the image should be smaller in room light. We recommend max. 74 cm. Since the projector recognizes Airplay, Miracast Screen Mirroring signals, it is possible to play videos with high resolution and surround sound directly from a smartphone, tablet, PC (Android, Windows and iOS) via WLAN. Another extra to be mentioned is that the projector can be connected to external wireless speakers via Bluetooth. Furthermore, it is Full HD 1080P and 4K (compressed) compatible. With only 25 decibels of operating noise, the model is already very quiet compared to others.
