Manufacturer ANXONIT offers the S1, a standard portable LCD LED projector with HDTV 1920 x 1080 resolution and a contrast of 15000:1. The service life is 30,000 hours thanks to the LEDs, which is over 20.5 years at four hours a day. The projector is equipped with an integrated media player, so playing files directly will not be a problem. The horizontal and vertical keystone correction provides leeway when setting up. An image width of up to 227 cm is possible because the projector has 500 ANSI lumens. However, if there is room light, the image should not be wider than 151 cm. Since the projector recognises Airplay, Miracast Screen Mirroring signals, it is possible to play videos with high resolution and surround sound from a smartphone, tablet, PC (Android, Windows and iOS) directly via WLAN. In addition, the Bluetooth option is a useful addition to the projector, especially for wireless audio transmission. The projector can also play 1080P and 4K (compressed).
