

Appotronics AL-DH620A

APPOTRONICS AL-DH620A

A brief introduction to the Appotronics AL-DH620A. The stationary DLP laser projector has an HDTV 1920 x 1080 resolution and a contrast of 35000:1. The manufacturer states a laser life of 20000 hours, which is over 13.7 years with a daily viewing time of 4 hours. With the lens shift function, the projector can be positioned very freely. An image width of up to 880 cm is possible as the projector has 7500 Ansi lumens. The projector can create rooms with residual light with a smaller image width, we recommend a maximum of 587 cm. If the image is still too small, the integrated edge blending software can help to project a larger image with additional projectors. Furthermore, the projector can play 1080P without any problems and can even project Blu-rays onto the ceiling thanks to 360° 1/2 projection.
