

Introducing:

The Digital Art Projector

LED200 from Artograph

Designed exclusively for artists!

Use the custom layout grids, precise color controls and color to B&W feature right away. With multiple input options, you'll be able to access digital images from almost any source—computers, SD cards, digital cameras or Smartphones. The maintenance-free LED lamp provides a crystal clear and accurate image reproduction up to 80" in almost any lighting condition, making it ideal for custom on-site work and presentations.

The LED200 features:

- Composition/layout grids for standalone use or image overlay.
- Ultra-precise color and image controls (size, rotation and reverse) with Color-to-B&W feature.
- Multiple input/output connection options (Audio/Video/RGB IN, USB, HDMI) to access digital images from virtually any source: Computers, SD Cards, Digital Cameras and even Smartphones.
- Advanced maintenance-free 200 lumen LED lamp projects a brilliantly clear, accurate image, with a lamp life up to 30,000 hours.
- Ideal for on-site work and presentations, projected image sizes range from 15" to 80" +, in virtually any lighting condition.

The LED200 Includes:

- Digital Art Projector with Lens Cap
- Remote Control
- Power Supply
- RGB-to-Computer & Component-to-RGB Cables
- Multi-Card USB Card Reader
- Operation Manual
- Storage Bag
