Excellent Quality

ASKProxima projectors conform to global dust-free manufacturing standards. Each product originates from a dust-free workshop of 100K grade purification standard. The products are subjected to a 24-hour continuous burn-in test before being packaged to ensure users of the highest quality products.

Dual-lamp Large Venue Projector Series E3755/E3815/E3855/E3655W/E3715W

Applications

The E3000 series is a full featured projector, an excellent choice for medium and large venue applications.

Boardrooms & Large Classrooms

Auditoriums & Churches

Rental & Staging Events

Exhibit Halls & Museums

Dual –Lamp Optical Engine

The E3000 series is a dual lamp source optical engine system with brightness of up to 8,500 lumen. An automatic failsafe feature allows the presentation to continue un-interrupted at reduced brightness in the event of a single lamp failure.

24 x 7 Continuous Operations

In the single lamp mode, the projector is suitable for 24 x7 operations with automatic lamp switching, saving energy while extending the lamp life.

Edge Blending

The edge blending feature provide for a seamless wide screen presentation with multiple side by side projectors. Images can be perfectly matched for brightness and color correction.

6,000:1 Contrast Ratio

The superior DLP chip technology with super-high contrast ratio of 6000:1 offers precise picture details and excellent contrast.

Corner Keystone Correction

Corner keystone correction allows for the adjustment of all four image angles. The horizontal digital keystone correction resolves the image distortion created when the projector's lens is not perpendicular to the screen. A useful feature when the projection environment is less than optimum.

Horizontal keystone correction

Four-corner keystone correction

360 Degree Projection

The E3000 series projector will project in any orientation. This is often a limitation for most projectors. This feature that is very useful for many specialty design applications.

Lens Shift

Motorized horizontal and vertical lens shift without loss of image quality. XGA models offer 50% vertical and 10% horizontal shift. WXGA models offer 60% vertical and 10% horizontal shift.

Automatic Focus

When the projector is positioned at a distance from the screen it will focus automatically. Should the distance be changed or the zoom lens adjusted, the projector will again adjust to the proper focus.

1.6x Zoom Ratio

The 1.6x standard zoom lens offers flexibility for quick set up or permanent installation.

Optional Replacement Lenses

The standard lens supplied with the projector is a 1.6x zoom. A variety of optional lenses is available including wide-angle, telephoto, short throw and fisheye.
