BRILENS CL-1280A

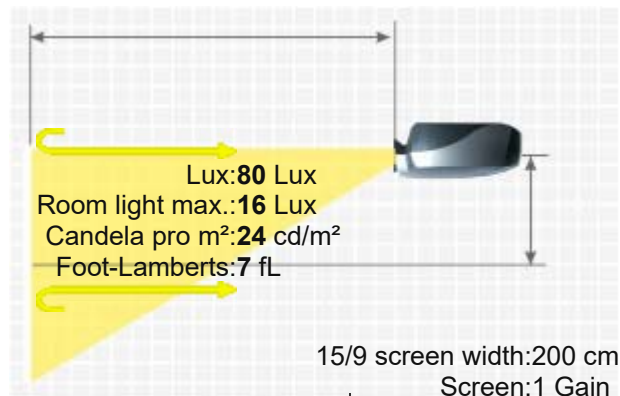

A brief introduction to the Brilens CL-1280A. The LCD LED projector has a WXGA 1280 x 768 resolution and a contrast of 3000:1. Thanks to the LEDs, the projector has a light life of up to 20000 hours, which is over 13.7 years if enjoyed for four hours a day. As Brilens specifies the brightness of the projector in lumens, we have calculated an approximate ansi-lumen value in this case. An image width of up to 141 cm is possible, as the projector has 192 Ansi lumens. However, if there is room light, the picture should be a maximum of 94 cm wide. It is also Full HD 1080P compatible. It was launched in 2015 and is no longer offered by the manufacturer Brilens.
