With the Mirage 10000, manufacturer Christie offers a large-format DLP projector with XGA 1024 x 768 resolution and a contrast of 500:1 300:1 according to Ansi. The integrated lens shift provides freedom when positioning the projector. The projector can illuminate images up to 871 cm wide thanks to its 10000 Ansi lumens. The projector can create rooms with residual light with a smaller image width, we recommend a maximum of 581 cm. It is no longer offered by the manufacturer Christie. It should also be noted that there are unfortunately no longer any replacement lamps available for the projector, neither originals nor replicas.
