

Christie Vivid Green

Brief Introduction

Beta 2.5

A brief introduction to the Christie Vivid Green. The stationary LCD projector has an XGA 1024 x 768 resolution and a contrast of 300:1. Includes a lens shift function, which provides freedom during installation. Thanks to the brightness of 3600 Ansi lumens, a picture width of 523 cm is possible. The projector can also handle slightly brighter rooms with a smaller image width (we recommend max. 349 cm). This model is no longer offered by Christie. It should also be noted that, unfortunately, there are no longer any replacement lamps for the projector, neither original nor replica.
