

CineVersum LV-WU65K Laser

CINEVERSUM LV-WU65K LASER

The CineVersum LV-WU65K Laser stationary 3D Laser DLP Beamer has 5700 Ansi-Lumen, a contrast of 1800:1 and a WUXGA 1920 x 1200 resolution. The service life is 20000 hours due to the laser, which is over 13.7 years with a daily viewing time of 4 hours. Including a lens shift and keystone correction function, which provides freedom during installation. As the LV-WU65K Laser is equipped with a microphone jack plug and 10W speakers, no additional audio equipment is required for presentations or training courses. The projector will be able to illuminate the 767 cm picture width well. The projector can manage rooms with residual light with a smaller image width, we recommend a maximum of 511 cm. In the event that the image is still too small, the projector offers integrated edge blending software, which allows several projectors to project a large image together. A smartphone with MHL connection can be connected directly to the MHL/HDMI port and transmit a 1080p / 60 Hz image mirroring (screen mirroring) while the smartphone is being charged at the same time. It is also Full HD 1080P and 3D compatible. This model is no longer offered by CineVersum.
