

Digital Projection M-Vision 27000 WU

The Digital Projection model M-Vision 27000 WU is a DLP laser projector with WUXGA 1920 x 1200 resolution and a contrast of 10000:1. The service life is 20000 hours due to the laser, which is over 13.7 years if enjoyed for four hours a day. The projector also offers a lens shift function that makes image adjustment childs play. 24000 Ansi lumens ensure that a picture width of 1574 cm is also possible. The projector creates rooms with residual light with a smaller image width, we recommend a maximum of 1049 cm. In the event that the image is still too small, the projector offers integrated edge blending software, which allows several projectors to project a large image together. Playing 1080P and 3D is also no problem for the projector. Even projection onto the ceiling is possible thanks to the 360° projection.
