

Digital Projection TITAN Quad 1080p 3D

Brief Introduction Beta 2.5

A brief introduction to the TITAN Quad 1080p 3D: The Digital Projection 3D DLP projector offers 16000 Ansi-Lumen, a contrast of 2000:1 and a HDTV 1920 x 1080 resolution. The integrated lens shift gives freedom when positioning the projector. Thanks to the brightness of 16000 Ansi lumens, a picture width of 1285 cm is possible. The projector can also handle slightly brighter rooms with a smaller image width (we recommend max. 857 cm). If the image is still too small, the integrated edge blending software can help to project a larger image with additional projectors. Even 1080P video signals and 3D are no problem for the projector. It was launched in 2013 and is no longer offered by the manufacturer Digital Projection, but is still very popular in our projector database.

Display Type

3 x 0,95" DLP Chip
HDTV 16/9 Ti Digital Light Processing Chip

Ansi-Lumen

Projector 16000

Screen 7111 Lux (bei 200 cm Screen)
