Brief Introduction Beta 2.5	The large-screen Digital Projection Titan Super Quad 1080p 3D DLP projector has 20000 Ansi lumens, a contrast of 2000:1 and an HDTV 1920 x 1080 resolution. The integrated lens shift gives freedom when positioning the projector. The projector can illuminate an image width of up to 1437 cm thanks to the 20000 Ansi lumens. The projector can create rooms with residual light with a smaller image width, max. 958 cm is recommended. If the image width is not sufficient, the projector offers integrated edge blending software, which allows several projectors to project a large image together. The model is also Full HD 1080P and 3D compatible. This model is no longer offered by Digital Projection, but is still very popular in our projector database.
