

Digital Projection TITAN WUXGA Quad 2000 3D

With the TITAN WUXGA Quad 2000 3D, manufacturer Digital Projection offers a large-format DLP projector with WUXGA 1920 x 1200 resolution and a contrast of 2000:1. The projector also offers a lens shift function that makes image adjustment childs play. Thanks to the brightness of 20000 Ansi lumens, a picture width of 1437 cm is possible. The projector will also manage slightly brighter rooms with a smaller image width (we recommend max. 958 cm). If the image is still too small, the integrated edge blending software can help to project a larger image with additional projectors. The model is also Full HD 1080P and 3D compatible. It was launched in 2013 and is no longer offered by the manufacturer Digital Projection, but is still one of the most popular projectors.
