The EffiGlow Mini Projector 720P LED LCD projector has 210 ANSI lumens and an HDTV 1280 x 720 resolution. The LEDs have a service life of 30,000 hours, which equates to over 20.5 years at 4 hours per day. 210 ANSI lumens ensure that an image width of 147 cm is also possible. However, if there is ambient light in the room, the image should be no more than 98 cm wide. Since the projector recognizes Airplay and Miracast screen mirroring signals, it is possible to play high-resolution videos with surround sound directly from a smartphone, tablet, or PC (Android, Windows, and iOS) via Wi-Fi. Another extra feature worth mentioning is that the projector can be connected to external wireless speakers via Bluetooth. Even 1080P video signals are no problem for the projector.
