

Emotn N1

EMOTN N1

The Emotn model N1 is an LCD LED projector with HDTV 1920 x 1080 resolution and a contrast of 1200:1. The manufacturer specifies an LED service life of 30000 hours, which converts to over 20.5 years at 4 hours per day. The built-in ambient light sensor detects the ambient light in the room and automatically optimizes the image. The projector also offers an integrated media player that can be used to play files directly. Horizontal and vertical keystone correction makes image setup childs play. A picture width of up to 227 cm is possible as the projector has 500 Ansi lumens. However, if room light is available, the picture should be a maximum of 151 cm wide. The projector has DLNA, Airplay, Miracast Screen Mirroring support, which enables direct playback of videos in high resolution and surround sound from smartphones, tablets and PCs with Android, Windows or iOS via WLAN. Thanks to the Bluetooth function, the projector can also be flexibly paired with other speakers. Video signals 1080P and 3D are also no problem for the projector. At 26 decibels, the projector is very quiet compared to other projectors.
