

Epson EB-875E

EPSON EB-875E

The Epson EB-875E short-throw laser LCD projector has 5,000 ANSI lumens, a contrast ratio of 5,000,000:1 and an HDTV resolution of 1920 x 1080. Thanks to the laser, it has a lifespan of 20,000 hours ? which equates to over 13.7 years if used for four hours a day. The projector is equipped with a built-in media player, so playing files directly is no problem. The horizontal and vertical keystone correction provides flexibility when setting it up. Thanks to the short-throw projection ratio of just 0. 25:1, the projector does not take up much space in the room. To project a 2-metre-wide image, the projector needs to be positioned just 50 cm from the screen. The projector is fitted with a microphone jack and a 16W speaker, so no additional speakers are required for presentations or training sessions. Should the image still be too small, the projector offers built-in edge-blending software, which allows multiple projectors to combine their images to create a single large image. As the projector supports AirPlay and Miracast screen mirroring signals, it is possible to stream high-resolution videos with surround sound directly from a smartphone, tablet or PC (Android, Windows and iOS) via Wi-Fi. Furthermore, the projector can play 1080p and 4K (compressed) content without any issues, and thanks to its 360° projection capability, it can even project Blu-rays onto the ceiling.
