

Epson EF-22N

EPSON EF-22N

The Epson model EF-22N is an LCD laser projector with HDTV 1920 x 1080 resolution and a contrast of 5000000:1. Due to the laser technology, the projector has a light life of up to 25000 hours, which is equivalent to over 17.1 years at 4 hours per day. A picture width of up to 321 cm is possible. However, the picture should be smaller in room light. We recommend max. 214 cm. Thanks to Google TV, the projector can be conveniently controlled by voice command. The model recognizes Chromecast, screen mirroring signals, so it is possible to play videos with high resolution and surround sound directly via WLAN from a smartphone, tablet or PC (Android, Windows and iOS). Thanks to the Bluetooth function, the projector can also be flexibly paired with other speakers. Even 1080P video signals are no problem for the projector. The operating noise of just 22 decibels makes the projection quiet.
