

Epson EH-TW8300 /W

EPSON EH-TW8300 /W

A brief introduction to the Epson EH-TW8300 /W. The high-end home cinema LCD projector has an HDTV 1920 x 1080 resolution and a contrast of 160000:1. Due to the lamp, the projector is specified with 3500 hours lamp life, which is over 4.8 years with two hours of enjoyment per day. The integrated lens shift provides freedom when positioning the projector. An image width of up to 487 cm is possible. However, the image should be smaller in room light. We recommend max. 325 cm. Furthermore, the projector can play 1080P and 4K (compressed) as well as 3D without any problems, and therefore all currently available Blu-ray formats can be recognized by the projector. The operating noise of just 24 decibels makes the projection quiet. This model is no longer offered by Epson, but is still a popular projector in our database.
