

Epson USA Powerlite L630SU

EPSON USA POWERLITE L630SU

A brief introduction to the Poverlite L630SU: The Epson USA stationary laser LCD projector offers 6000 Ansi lumens, a contrast of 2500000:1 and a resolution. The manufacturer specifies a laser service life of 20000 hours, which is over 13.7 years if enjoyed for four hours a day. Including an integrated media player with which files can be played directly. The built-in lens shift and keystone correction function provides freedom when adjusting the projection. An image width of up to 787 cm is possible as the projector has 6000 Ansi lumens. The projector can create rooms with residual light with a smaller image width, we recommend a maximum of 525 cm. If the image width is not sufficient, the projector offers integrated edge blending software, which allows several projectors to project a large image together. The model recognizes screen mirroring signals, so it is possible to play videos with high resolution and surround sound directly via WLAN from a smartphone, tablet or PC (Android, Windows and iOS). It is also Full HD 1080P compatible and can therefore project Blu-rays even onto the ceiling using 360° projection. The model built in 2021 is no longer offered by Epson USA.
