

Epson USA PowerLite L695SE

EPSON USA POWERLITE L695SE

A brief introduction to the Epson USA PowerLite L695SE. The LCD laser projector has a UHD (4K2K) 3840 x 2160 resolution and 6000 ANSI lumens. Thanks to laser technology, the projector has a light lifespan of up to 30,000 hours, which is over 20.5 years of four hours of use per day. Since it is a short-throw projector, the projector can be placed very close to the wall. For a 2 m wide image, the projector only needs to be 100 cm away from the screen. If the image width is not sufficient, the projector offers integrated edge blending software, which allows several projectors to project a large image together. The model recognizes Miracast Screen Mirroring signals, so it is possible to play videos with high resolution and surround sound directly from a smartphone, tablet or PC (Android, Windows and iOS) via WLAN. Video signals 1080P and 4K are also no problem for the projector, and it even has the option of projecting HD 1080P and 4K Blu-rays onto the ceiling thanks to 360° projection.
