

HORLAT Smart Beamer

HORLAT SMART BEAMER

Brief introduction to the HORLAT Smart Beamer. This standard portable LCD LED projector has an HDTV resolution of 1920 x 1080 and a contrast ratio of 21,000: 1. Manufacturer HORLAT specifies a lifespan of 30,000 hours, which would equate to over 20.5 years at 4 hours per day. Thanks to horizontal and vertical keystone correction, the projector can be set up with great flexibility. 1,500 ANSI lumens ensure that an image width of up to 393 cm is possible. However, if there is ambient light in the room, the image should be no wider than 262 cm. Google TV transforms the projector into a versatile media hub that can be seamlessly integrated into a smart home. Since the projector supports Chromecast, AirPlay, Miracast screen mirroring signals, it's possible to stream high-resolution videos with surround sound directly from a smartphone, tablet, or PC (Android, Windows, and iOS) via Wi-Fi. In addition, thanks to its Bluetooth functionality, the projector can be flexibly paired with other speakers. The model is also compatible with Full HD 1080p and 4K (compressed). Even projecting onto the ceiling is possible thanks to the 360° projection capability.
