

InFocus IN5502/L

INFOCUS IN5502/L

A brief introduction to the InFocus IN5502/L. The stationary DLP projector has a WXGA 1280 x 800 resolution and a contrast of 2000:1. The integrated media player allows files to be played directly. The built-in lens shift function provides freedom when setting up. A picture width of up to 718 cm is possible, if the picture width is smaller (we recommend max. 479 cm), rooms with residual light are also no problem. Furthermore, the projector can play 1080P without any problems. With only 29 decibels of operating noise, the model is very quiet compared to others. The projector was launched in 2009 and is no longer sold by the manufacturer.
