

Jmgo N7L

J M G O N 7 L

Brief Introduction

Beta 2.5

A brief introduction to the Jmgo N7L. The micro-portable DLP projector has an HDTV resolution of 1920 x 1080 and a contrast of 750:1. The horizontal and vertical keystone correction provides scope for positioning. 700 Ansi lumens ensure that a picture width of 269 cm is also possible. However, if room light is available, the picture should be a maximum of 179 cm wide. Even 1080P video signals are no problem for the projector. On the market since 2018, the model is no longer offered by the manufacturer Jmgo, but is still very popular in our projector database.
