The PH300S LED DLP projector from LG has 300 Ansi lumens, a contrast of 100000:1 and an HDTV 1280 x 720 resolution. The manufacturer specifies an LED service life of 30,000 hours, which converts to over 20.5 years at 4 hours of use. Including an integrated media player with which files can be played directly. Thanks to the brightness of 300 Ansi lumens, a picture width of 176 cm is possible. In room light, the picture should be max. 117 cm wide. Thanks to the built-in rechargeable battery, the projector does not require a power supply for 2 hours, so it can be set up spontaneously and easily anywhere. A smartphone with MHL connection can be connected directly to the MHL/HDMI port and transmit a 1080p / 60 Hz image mirroring (screen mirroring) while the smartphone is being charged at the same time. The projector was launched in 2014 and is no longer sold by the manufacturer, but is still a very popular projector.
