

miroir M175

M I R O I R M 1 7 5

With the M175, manufacturer miroir offers a game-portable DLP LED projector with HDTV 1280 x 720 resolution. The manufacturer specifies an LED service life of 20000 hours, which translates to over 13.7 years at 4 hours per day. The projector will be able to illuminate a 144 cm picture width well. If room light is available, however, the picture width should ideally not exceed 96 cm. The rechargeable projector is not dependent on a direct power source and can therefore be set up very quickly, freely and spontaneously. Playing 1080P is also no problem for the projector. The model built in 2018 is no longer offered by miroir.

Brief Introduction
