

Mitsubishi XL7000U

MITSUBISHI XL7000U

A brief introduction to the Mitsubishi XL7000U. The LCD projector has an XGA 1024 x 768 resolution and a contrast of 2000:1. The built-in lens shift function provides freedom when setting up. An image width of up to 628 cm is possible, if the image width is smaller (we recommend max. 419 cm), rooms with residual light are also no problem. Furthermore, the projector can play 1080P without any problems and even has the option of projecting HD 1080P Blu-rays onto the ceiling using 360° projection. The projector was launched in 2012 and is no longer sold by the manufacturer.
