

Nec PA721X

NEC PA721X

The stationary PA721X 3D LCD has 7200 Ansi lumens, a contrast of 6000:1 and an XGA 1024 x 768 resolution. With the lens shift function, the projector can be positioned very freely. 7200 Ansi lumens ensure that a picture width of 739 cm is also possible. The projector manages rooms with residual light with a smaller image width, we recommend a maximum of 493 cm. If the image is still too small, the integrated edge blending software can help to project a larger image with additional projectors. Video signals 1080P and 4K (compressed) as well as 3D are also no problem for the projector, meaning that all Blu-ray formats currently available can be recognized by the projector. The projector was launched in 2014 and is no longer sold by the manufacturer.
