

# NexiGo TriVision Ultra MKII

NEXIGO TRIVISION ULTRA MKII

The home cinema NexiGo TriVision Ultra MKII 3D laser DLP projector has 4000 ANSI lumens, a contrast ratio of 1500:1 FOFO Contrast and a UHD (4K2K) 3840 x 2160 resolution. The laser light source has a lifespan of 25,000 hours, which is over 17.1 years with a daily viewing time of 4 hours. A picture width of up to 643 cm is possible. If the picture width is smaller (we recommend max. 429 cm), rooms with low light are no problem. The projector has Airplay, Miracast Screen Mirroring support, which makes it possible to play videos in high resolution and surround sound from smartphones, tablets and PCs with Android, Windows or iOS directly via WLAN. In addition, the Bluetooth option is a useful addition for the projector, especially for wireless audio transmission. The projector can also play 1080P and 4K as well as 3D, and thus all currently available Blu-ray formats can be recognised by the projector. At just 28 decibels, the model is already very quiet compared to others. The model was built by NexiGo in 2025 and is no longer up to date, but it is still very popular in our projector database.
