

Optoma ZU720T

OPTOMA ZU720T

The Stationary ZU720T 3D Laser DLP Projector from Optoma has 7500 ANSI lumens, a contrast ratio of 1000000:1, and a WUXGA 1920 x 1200 resolution. The manufacturer specifies a laser life of 30,000 hours, which equates to over 20.5 years at 4 hours per day. It includes an integrated media player that allows files to be played directly. The lens shift function allows the projector to be positioned very freely. An image width of up to 880 cm is possible; if the image width is smaller (we recommend max. 587 cm), even rooms with residual light are no problem. The projector can also play 1080P and 3D without any problems and can even project Blu-rays onto the ceiling thanks to its 360° projection. The model built in 2018 is no longer available from Optoma.
