

Polarizing A1

The A1 LED LCD has 750 ANSI lumens, a contrast ratio of 20000:1, and HDTV 1920 x 1080 resolution. Thanks to the LEDs, the projector has a specified light life of 30,000 hours, which equates to over 20.5 years at 4 hours per day. An image width of up to 278 cm is possible, as the projector has 750 ANSI lumens. However, if there is ambient light in the room, the image should not exceed 185 cm in width. Google TV turns the projector into a versatile media hub that can be seamlessly integrated into a smart home. Since the projector recognizes Airplay and Miracast screen mirroring signals, it is possible to play videos from a smartphone, tablet, or PC (Android, Windows, and iOS) with high resolution and surround sound directly via Wi-Fi. Another extra feature worth mentioning is that the projector can be connected to external wireless speakers via Bluetooth. Furthermore, the projector can play 1080P and 4K (compressed) without any problems. The operating noise of only 28 decibels makes the projection quiet.
