With the PRJG74, manufacturer Pyle offers an LCD projector with WVGA 800 x 480 resolution and a contrast of 1000:1. The lamp life of the projector is specified as 30000 hours, which is equivalent to 41.1 years at 2 hours per day. The integrated media player allows files to be played directly. As Pyle specifies the brightness of the projector in lumens, we have calculated an approximate Ansi lumen value in this case. 72 Ansi lumens ensure that a picture width of 86 cm is also possible. However, if room light is available, the picture should be a maximum of 57 cm wide. Even 1080P video signals are no problem for the projector. It was launched in 2017 and is no longer offered by the manufacturer Pyle.
