Features

Screen Mirroring

The stationary XG 3200S LCD projector from Sharp has 287 Ansi lumens, a contrast of 100:1 and a resolution. As Sharp specifies the brightness of the projector in lumens, we have calculated an approximate Ansi lumen value in this case. The projector can illuminate a picture width of up to 148 cm well thanks to the 287 Ansi lumens. In room lighting, however, the picture width should ideally be less than 99 cm. This model is no longer offered by Sharp. It should also be noted that there are unfortunately no longer any replacement lamps available for the projector, neither originals nor replicas.
