With the LUMIS AR, manufacturer SIM2 offers a high-end home cinema DLP projector with HDTV 1920 x 1080 resolution and a contrast of 30000:1. The built-in lens shift and keystone correction function provides freedom when setting up. Thanks to the brightness of 5000 Ansi lumens, a picture width of 718 cm is possible. The projector can also handle slightly brighter rooms with a narrower picture width (we recommend max. 479 cm). Video signals 1080P and 3D are also no problem for the projector. The model was built by SIM2 in 2015 and is no longer current, but is still very popular in our projector database.
