

VenirCool Q1 Pro

VENIRCOOL Q1 PRO

The VenirCool model Q1 Pro is an LCD LED projector with HDTV 1920 x 1080 resolution and a contrast of 10000:1. The manufacturer specifies an LED service life of 30000 hours, which equates to over 20.5 years with a daily viewing time of 4 hours. The built-in ambient light sensor detects the ambient light in the room and automatically optimizes the image. The projector also offers an integrated media player that can be used to play files directly. Thanks to the horizontal and vertical keystone correction, the projector can be positioned very freely. As VenirCool specifies the brightness of the projector in lumens, we have calculated an approximate Ansi lumen value in this case. 324 cm image width, the projector will be able to illuminate well. If room light is available, however, the picture width should ideally not exceed 216 cm. The model recognizes Airplay, Miracast Screen Mirroring signals, so it is possible to play videos with high resolution and surround sound directly via WLAN from a smartphone, tablet or PC (Android, Windows and iOS). Thanks to the Bluetooth function, the projector can also be flexibly paired with other speakers. Video signals 1080P and 4K (compressed) as well as 3D are also no problem for the projector, meaning that all Blu-ray formats currently available can be recognized by the projector. With only 26 decibels of operating noise, the model is already very quiet compared to others.
