

Viewsonic M10E

VIEWSONIC M10E

Brief Introduction

Beta 2.5

The M10E laser DLP projector from Viewsonic has 2200 Ansi lumens, a contrast of 3000000:1 and an HDTV 1920 x 1080 resolution. The manufacturer Viewsonic specifies a service life of 20000 hours, which is over 13.7 years if enjoyed for four hours a day. The ambient light sensor allows the projector to automatically optimize the projected image. A built-in horizontal and vertical keystone correction provides freedom when positioning the projector. As Viewsonic specifies the brightness of the projector in lumens, we have calculated an approximate Ansi lumen value in this case. 2200 Ansi lumens ensure that a picture width of 477 cm is also possible. However, if room light is available, the picture should be a maximum of 318 cm wide. As the projector recognizes Airplay, Miracast Screen Mirroring signals, it is possible to play videos with a high resolution and surround sound directly from a smartphone, tablet, PC (Android, Windows and iOS) via WLAN. Thanks to the Bluetooth function, the projector can also be flexibly paired with other speakers. Even 1080P video signals are no problem for the projector. The operating noise of just 29 decibels makes the projection quiet.
