VISULAPEX NX3

The VISULAPEX NX3 3D LED LCD projector has 900 Ansi-Lumen, a contrast of 15000:1 and a HDTV 1920 x 1080 resolution. It is an LED projector with 30000 hours of light life, which is over 20.5 years with a daily viewing of 4 hours. The built-in ambient light sensor detects the ambient light in the room and automatically optimizes the image. The projector is equipped with an integrated media player, so direct playback of files will not be a problem. The horizontal and vertical keystone correction provides leeway when setting up. As VISULAPEX specifies the brightness of the projector in lumens, we have calculated an approximate ansi-lumen value in this case. An image width of up to 305 cm is possible, as the projector has 900 Ansi lumens. However, if room light is available, the picture should be max. 203 cm wide. As the projector recognizes DLNA, Airplay, Miracast Screen Mirroring signals, it is possible to play videos with a high resolution and surround sound directly from a smartphone, tablet, PC (Android, Windows and iOS) via WLAN. In addition, the Bluetooth option is a useful addition to the projector, especially for wireless audio transmission. Even 1080P video signals and 3D are no problem for the projector. The operating noise of just 26 decibels makes the projection quiet.
