

Vivitek Qumi Q5 mit MHL

Brief Introduction

Beta 2.5

Brief presentation of the Vivitek Qumi Q5 with MHL. The micro-portable DLP LED projector has a WXGA 1280 x 800 resolution and a contrast of 2500:1. The lifespan of the LEDs is 30000 hours, which converts to over 20.5 years at 4 hours of use. The projector also offers an integrated media player that can be used to play files directly. 500 Ansi lumens ensure that a picture width of 227 cm is also possible. However, if room light is available, the picture should be a maximum of 151 cm wide. The rechargeable projector is not dependent on a direct power source and can therefore be set up very quickly, freely and spontaneously. A smartphone with MHL connection can be connected directly to the MHL/HDMI port for 1080p / 60 Hz image mirroring (screen mirroring). The model is also Full HD 1080P compatible. On the market since 2015, the model is no longer offered by the manufacturer Vivitek.

Display Type

1 x DLP Chip
