

VOPLLS VP-I Gimbal

The VP-I Gimbal LED LCD projector from VOPLLS has 1800 ANSI lumens, a contrast ratio of 30000:1, and HDTV 1920 x 1080 resolution. It is an LED projector with a light life of 100,000 hours, which would be over 68.5 years if viewed for 4 hours a day. Files can be played directly thanks to the integrated media player. Horizontal and vertical keystone correction ensures easy image setup. Since VOPLLS specifies the brightness of the projector in lumens, we have calculated an approximate ANSI lumen value in this case. The projector can illuminate images up to 431 cm wide thanks to its 1800 ANSI lumens. However, in room lighting, the image width should ideally be less than 287 cm. Since the projector recognizes Airplay and Miracast screen mirroring signals, it is possible to play videos with high resolution and surround sound directly from a smartphone, tablet, or PC (Android, Windows, and iOS) via Wi-Fi. Another extra feature worth mentioning is that the projector can be connected to external wireless speakers via Bluetooth. The projector can also play 1080P and 4K (compressed) without any problems.
