

Wanbo T6 Max Autofocus

WANBO T6 MAX AUTOFOCUS

A brief introduction to the Wanbo T6 Max Autofocus. The standard portable LCD LED projector has an HDTV 1920 x 1080 resolution and 650 Ansi lumens. It is an LED projector with 20000 hours of light life, which is over 13.7 years with four hours of use per day. The built-in ambient light sensor detects the ambient light in the room and automatically optimizes the picture. The integrated media player allows files to be played directly. An image width of up to 259 cm is possible as the projector has 650 Ansi lumens. However, if room light is available, the picture should be max. 173 cm wide. The model recognizes screen mirroring signals, so it is possible to play videos with high resolution and surround sound directly via WLAN from a smartphone, tablet or PC (Android, Windows and iOS). Another extra is that the projector can be connected to external wireless speakers using the Bluetooth function. The model is also Full HD 1080P and 4K (compressed) compatible. The operating noise of just 29 decibels makes the projection quiet. The model was built by Wanbo in 2022 and is no longer current.
