

XGIMI Titan

XGIMI TITAN

The Titan 3D Laser DLP has 6250 ANSI lumens, a contrast ratio of 5000000:1, and a UHD (4K2K) 3840 x 2160 resolution. Thanks to the laser, the projector has a specified light life of 30,000 hours, which equates to over 20.5 years of enjoyment at four hours per day. The projector also offers a lens shift function for flexible projection adjustment without loss of quality. Since XGIMI specifies the brightness of the projector in lumens, we have calculated an approximate ANSI lumen value in this case. The brightness of 6250 ANSI lumens allows for an image width of 803 cm. The projector can also handle slightly brighter rooms with a smaller image width (we recommend a maximum of 535 cm). 1080P and 4K video signals as well as 3D are no problem for the projector, which means that all currently available Blu-ray formats can be recognized by the projector. The operating noise of only 28 decibels makes the projection quiet.
