With the HM103, manufacturer XNANO offers a portable LCD LED projector for gaming with HDTV 1920 x 1080 resolution and a contrast ratio of 1000:1. The manufacturer specifies an LED lifespan of 30,000 hours, which would equate to over 20.5 years at 4 hours per day. An image width of up to 249 cm is possible. However, in room lighting, the image should be set to a smaller size. We recommend a maximum of 166 cm. The projector supports AirPlay and Miracast screen mirroring, allowing for the direct streaming of high-resolution videos and surround sound via Wi-Fi from smartphones, tablets, and PCs running Android, Windows, or iOS. Additionally, Bluetooth connectivity is a useful feature for the projector, particularly for wireless audio transmission.
