

XuanPad V18

XUANPAD V18

Brief introduction to the XuanPad V18. The portable LCD LED game projector has an HDTV 1920 x 1080 resolution and 450 Ansi lumens. Thanks to its LEDs, the projector has a light life of up to 30,000 hours, which is over 20.5 years if used for four hours a day. It includes an integrated media player that allows files to be played directly. The brightness of 450 ANSI lumens allows for an image width of 216 cm. In room lighting, the image should be a maximum of 144 cm wide. Since the projector recognizes Airplay and Miracast screen mirroring signals, it is possible to play videos with high resolution and surround sound directly from a smartphone, tablet, or PC (Android, Windows, and iOS) via Wi-Fi. In addition, thanks to the Bluetooth function, the projector can be flexibly paired with other speakers. Furthermore, the projector can play 1080P without any problems.
